RPL Success Story

Success Story

Satyik Bag, Age 42 year old with 20 years of experience as Goldsmith comes from a very small district of West Bangal with his small family with age of 14 years, he came to place for Karigari. He become one of the finest workmanship. After 3 years work under a small shop to very less wages. He also used earn some extra money. somehow managed to have workers working under him. but the output from the shop is not enough to run his family with a rented house.

Satyik Bag, Age 42, Cuttack, Odisha

named as Hooghly. He lives wife and two children. At the Cuttack, Odisha a well known learned for 3 long years to workers as gold of long duration he started to gain some experience with a to work hard overtime to Finally after few years he his own shop with three Though he is having a shop

Post RPL Story

It was a tough time for me when I came to Cuttack with a big hope. I was hardly used to earn 30-40 rupees in a day. Fortunately I came to know about RPL and free training for swarna karigar those who are experienced from one of my friend. I got this platform where I learnt many new things and got to develop myself much more than before. Thanks to the entire team of Edujobs for providing such useful and beneficial training to me, where I got an identity by getting a recognition form Govt. for being an experienced goldsmith.

September Birth Stone - Sapphire

For centuries, the Sapphire has been referred to as the ultimate blue gemstone. Since Ancient times the Blue Sapphire represented a promise of honesty, loyalty, purity and trust. To keep with this tradition Sapphires are one of the most popular engagement gemstones today.

Sapphire is found in many parts of the world, but the most prized Sapphires are from Myanmar (Burma), Kashmir and Sri Lanka. Sapphires with highly saturated violet-blue color and “velvety” or “sleepy” transparency are rarer. The purer the blue of the Sapphire, the greater the price. However, many people find that the darker hues of Sapphire can be just as appealing.

Sapphires are not only blue, they come in almost every color of the rainbow: pink, yellow, orange, peach, and violet colors. The most sought-after color fancy Sapphire is the rare and beautiful Padparadscha: a pink-orange corundum with a distinctive salmon color reminiscent of a tropical sunset. These ultra-rare, ultra-expensive stones are among the most coveted gems in the world.

RPL - Type 4 : Best in Class Employer

RPL4

Jewellery Companies can now certify their artisans under Pradhan Mantri Kaushal Vikas Yojna (PMKVY) in Recognition of Prior Learning (RPL) Type 4

- Reward Money of INR 500 to be given to the certified artisans.
- Certified Artisans will also receive the Accidental Insurance for 3 Years.

To conduct Certification program in your company kindly get in touch with us.

Different Diamond Shapes

ROUND BRILLIANT

The round brilliant cut diamond is the most popular shape of diamond. For hundreds of years, diamond cutters have been working with this cut to maximize its brilliance and fire. While this cut offers great flexibility within the four C's, you will want to select higher quality grades to bring out the most brilliance within a round diamond.

PRINCESS

Princess cut diamonds are exceptionally brilliant because of the way they are cut and are available in both square and rectangular shapes. The color that is emitted from princess cut diamonds is very unique. While the color of other diamond is displayed mainly in the center, the princess cut diamonds show distinct color in each of the corners as well.

MARQUISE

A marquise cut diamond is a perfect shape for maximizing carat weight by emphasizing the size of the diamond. Its unique shape creates the effect of longer, more slender hands and fingers. The outline of a diamond is determined by its length to width ratio, which also provides an image of the shape and look of the diamond.

Different Diamond Shapes

CUSHION

Sometimes called a pillow-cut diamond, the cushion cut is a timeless cut that has earned its name for its pillow shape. Cushion cut diamonds tend to have impeccable brilliance and clarity in their appearance which can be attributed to their rounded corners and larger facets. These diamonds are available in square and rectangular shapes.

EMERALD

Emerald cut diamonds have a unique optical appearance because of the rectangular facets step-cut into the diamond's pavilion. This cut showcases the diamond's original clarity beautifully because of its large rectangular table which will also make inclusions and color more apparent.

RADIANT

Perfect for those looking for a unique style, radiant cut diamonds feature uniquely trimmed corners which combines the lines of an emerald cut with the brilliance of a round diamond. The sparkle of this diamond cut looks beautiful when combined with a variety of other diamond cuts.

Different Diamond Shapes

PEAR

Combining round and marquise cuts, the teardrop style of pear shaped diamonds is exceptional. The slender pear shape will give fingers and hands a slimmer appearance while creating a soft and delicate look. Pear shaped diamonds are cut to produce maximum brilliance, so it's important to look for excellent symmetry.

OVAL

Oval cut diamonds have a classic appearance with a modern twist! It is a popular cut in all types of jewelry, especially in engagement rings, making it easy to match with other jewelry. It has an incredible brilliance, similar to the round brilliant cut, but also has the advantage of accentuating long, slender fingers.

ASSCHER

Asscher cut diamonds are often mistaken for an emerald cut because of its similar cut style; however an asscher is square rather than rectangular. Created in the early 1920s, the asscher cut has recently resurged in popularity, especially amongst celebrities.

Gem & Jewellery Skill Council of India

“ We aim to create an organized training and development ecosystem in the gems and jewellery industry to produce skilled workforce at par with global quality standards. ”
